

Workshop 2

Progressing
the COREMI working groups
objectives

Montpellier, France

October 22nd-23rd, 2015

Aim and design

In order to allow the 4 working groups (see below) in the COREMI COST action FA1404 to progress, the workshop 2 will be held in Montpellier (France). It will rely exclusively on invited participants. The workshop was designed in such a way as to alternate parallel sessions dedicated to concretely work in small groups and plenary sessions for results presentation and discussions.

	TOPIC	GLOBAL AIM FOR 2015
WG1	Developing alternative control measures	Evaluation of current control methods and strategies for integrating existing and new methods for achieving better red mite control.
WG2	End users (One Health)-interdisciplinary approach	Towards a feasible on-farm monitoring protocol
WG3	Genetic structure in a changing world	Laying the groundwork for molecular studies with a focus on resistances against pesticides
WG4	Epidemiology, pathology, geographical mapping and surveillance tools	Prevalence and effects of PRM infestation: state of art

Location of social events in Montpellier
